

GRSA Shared Resource Charge Schedule

| Service/Item                        | Price/Unit   |               | Format                | Special Notes                             |
|-------------------------------------|--------------|---------------|-----------------------|---|
|                                     | CC member    | non-CC member |                       |   |
| Individual shRNA clones             | \$25/clone   | \$25/clone    | glycerol stock        |   |
| Non-Silencing control               | \$25/clone   | \$25/clone    | glycerol stock        |   |
| Positive control                    | \$25/clone   | \$25/clone    | glycerol stock        | GAPDH, EG5                                |
| Empty pGIPZ Vector                  | \$25/clone   | \$25/clone    | glycerol stock        |   |
| Pre-assembled GO libraries          | \$10/clone   | \$10/clone    | glycerol stock, plate | 96-well format                            |
| Custom shRNA libraries              | \$15/clone   | \$15/clone    | glycerol stock, plate | 96-well format                            |
| Nucleic acid purification           | \$350/plate  | \$350/plate   | DNA, 96-well plate    | 96-well format only                       |
| Individual viruses                  | \$250/clone  | \$250/clone   | 8mls                  | non-concentrated supernatant              |
| Individual viruses                  | \$200/clone  | \$200/clone   | 8mls                  | If DNA provided                           |
| Arrayed viruses                     | \$800        | \$800         | plate                 | 96-well format                            |
| Single cell line/infection          | \$350        | \$350         | n/a                   | including virus packaging                 |
| Arrayed cell lines                  | \$1,200      | \$1,200       | 96-well plate         | including virus packaging                 |
| Combined services: GO set           | \$1,250      | \$1,250       | DNA                   | pre-arrayed bacterial stocks to DNA       |
| Combined services: GO set           | \$2,000      | \$2,000       | virus                 | pre-arrayed bacterial stocks to virus     |
| Combined services: GO set           | \$2,350      | \$2,350       | stable cells          | pre-arrayed bacterial stocks to cells     |
| Combined services: custom shRNA set | \$1,500      | \$1,500       | glycerol stock        | cherrypicking to bacterial stocks         |
| Combined services: custom shRNA set | \$1,750      | \$1,750       | DNA                   | cherrypicking to DNA                      |
| Combined services: custom shRNA set | \$2,350      | \$2,350       | virus                 | cherrypicking to virus                    |
| Combined services: custom shRNA set | \$2,650      | \$2,650       | stable cells          | cherrypicking to stable cells             |
| Instrument training                 | \$80/hr      | \$80/hr       | prorated              | required for all new and infrequent users |
| Robotic instruments                 | \$60/hr      | \$60/hr       | assisted use          |   |
| Robotic instruments                 | \$40/hr      | \$40/hr       | unassisted use        |   |
| user account management             | \$25         | \$26          |                       | Account setup and management              |
| SAN storage                         | upon request | upon request  |                       | additional cost for long term storage     |
