PSYCHOLOGY FELLOWSHIP
2016-2017

*****

THE MENNINGER DEPARTMENT OF
PSYCHIATRY AND BEHAVIORAL SCIENCES
BAYLOR COLLEGE OF MEDICINE

AND

THE PSYCHIATRY SERVICE
BEN TAUB HOSPITAL

One Baylor Plaza
Houston, TX 77030
713-873-3168

ASIM SHAH, MD
CHIEF OF PSYCHIATRY, HARRIS COUNTY HOSPITAL DISTRICT AND
BEN TAUB HOSPITAL

ARACELI FLORES, PH.D
TRAINING DIRECTOR
OVERVIEW

Ben Taub Hospital (BTH) is a county-funded general hospital built in 1963 to serve the needs of the Houston area. The Psychiatry Service at BTH provides inpatient and outpatient treatment for medically indigent and psychiatrically impaired persons. As a member of the Psychiatry team, the postdoctoral fellow will provide assessment and therapy services to psychiatric patients in the outpatient and inpatient setting. For the upcoming academic year (2016-2017), two postdoctoral fellowships will be available for the Baylor College of Medicine/Ben Taub Hospital (BCM/BTH).

Postdoctoral fellows of the BCM/BTH Adult/Child Track will complete their fellowships through Ben Taub Mental Health Services (BTMHS) located at BTH. During the fellowship year, postdoctoral fellows will spend 6 months in the BTMHS outpatient clinic and 6 months on the adult acute psychiatric inpatient unit at BTH. On the outpatient rotation, fellows will provide psychological assessments and therapy services to psychiatric outpatients, psychological assessment and consultation services to medical inpatients through the hospital Consultation and Liaison Service (C&L), and serve as a primary clinician in the Adolescents in Motion Program. On the inpatient rotation, the fellow will become an integral member of 2 multi-disciplinary treatment teams. Fellows function as consultants on the treatment teams and provide services that include individual therapy, group therapy, and brief psychological assessments to patients admitted to the inpatient unit. Furthermore, the inpatient fellow will provide outpatient therapy to children ages 3-17 years old. The fellow will also have the opportunity to choose an Elective rotation (i.e. Geriatric, research, autism, specialized outpatient groups). In addition to these opportunities, fellows will have opportunities to train pre-doctoral fellows/psychiatry residents, teach psychology seminars to medical students, and participate in ongoing research protocols. For more information on the description of each rotation see Appendix IV.

Members of both the psychology and psychiatry faculty provide supervision as appropriate to the clinical work being done and research activities pursued by the fellow. A full range of educational opportunities of the BCM and the Texas Medical Center is available, including Baylor Psychiatry Grand Rounds, on-site workshops, and regularly scheduled training activities (e.g., individual and group supervision), as well as a post-doc seminar series for Baylor-affiliated fellows in the Houston area. The fellow may develop a research project for presentation and/or publication during their term but are expected to provide lectures appropriate for the training of psychology and psychiatry fellows and/or residents and to participate in the training activities of the Service for psychology trainees, psychiatry residents, medical students, and other staff in training at BTH. In addition, the fellowship meets the licensure requirements for the state of Texas, and the fellow is encouraged to pursue licensure in Texas during the fellowship year.

The training program is flexible and tailored to the fellow’s interests and needs upon agreement of supervisors and fellow. Some activities are required, but there is considerable room for customization within the general categories of training activities. The allocation of time to activities is as follows:

- Provision of service activities: 80% (32 hours)
- Supervision and educational activities: 10% (4 hours)
- Discretionary time: 10% (4 hours)
The fellowship begins 8/1/2016 and ends 7/31/2017. Applicants must be graduates of an APA- or CPA-accredited program in professional psychology and must have completed an APA- or CPA-accredited internship. The successful applicant will be interested in public mental health service, will desire advanced training in the application of psychological principles and treatment to major mental illnesses, and will show promise for significant contributions to mental health service and research.

TRAINING GOALS AND OBJECTIVES

I. The fellowship will promote **general professionalism**, including appreciation of and sensitivity to diversity and ethics, and preparation for licensure.
   A. The fellow will work with a culturally diverse patient population, including those who are traditionally underserved.
   B. The fellow will participate in the BCM Psychology Fellow Network, which exposes fellows to ethical and professional issues and promotes collegial relationships among fellows in the Houston area.
   C. The fellow will be prepared for licensure in the state of Texas.

II. The fellowship will provide training in **psychological assessment**.
   A. The fellow will conduct focused psychological assessments of medically ill patients in the general hospital setting.
   B. The fellow will conduct comprehensive psychological assessments for patients in the outpatient setting.
   C. The fellow will conduct problem-focused, brief psychological assessments for patients on the acute inpatient psychiatric unit.

III. The fellowship will provide training in **psychotherapeutic interventions**.
   A. The fellow will conduct individual and group psychotherapy in outpatient programs for patients with chronic psychopathology, including personality disorders.
   B. The fellow will conduct individual outpatient psychotherapy with adults.
   C. The fellow will conduct individual and family therapy with children and adolescents.
   D. The fellow will conduct time-limited individual psychotherapy for patients on the acute inpatient psychiatric unit.
   E. The fellow will co-facilitate a daily therapy group(s).

IV. The fellowship will promote **multi-disciplinary consultation**.
   A. The fellow will serve as a consultant to other mental health care disciplines, including psychiatry, social work, psychiatric nursing, occupational therapy, and chemical dependency counseling.
   B. The fellow will help teach other mental health care providers about the psychological services he or she conducts, both informally through discussion and formally through seminar teaching.

V. The fellowship will provide training in **clinical supervision**.
   A. The fellow will supervise one to two psychotherapy patients being treated by either psychology trainees and/or psychiatry resident(s).
   B. The fellow will participate in didactic presentations to either other psychology trainees, medical students and/or psychiatric residents.
VI. The fellowship will promote evidence-based practice.
   A. The fellow will conduct clinical activities based on an empirical approach, consulting relevant research, and using scientific methods of evaluating evidence.
   B. The fellow will be involved in ongoing research protocols and will develop at least one project for presentation and/or publication by the end of the fellowship.

TRAINING COMPETENCIES AND ACTIVITIES

I. General Professionalism

   A. The fellow participates in a weekly Psychology Service meeting focusing on clinical and ethical issues and other professional matters. (Required)
   B. The fellow participates in the BCM Psychology Fellow Network, an organization of postdoctoral fellows in the Houston area. The Network meets three to four times per year to discuss professional topics including ethics, licensure, and cultural diversity. (Required)
   C. The fellow participates in a weekly DBT-meeting focusing on providing support and consultation to clinicians working with difficult populations. (Required)

II. Psychological Assessment

   A. Consultation and Liaison (C&L) service: The fellow provides consultation and assessment services to the psychiatric C&L service, which consults to the entire hospital. Typical C&L evaluations are brief and focused and may center on issues of competence, need for guardianship, identification of underlying psychosis, and prognosis for rehabilitation. (Required)
   B. Outpatient psychological assessment: The fellow is responsible for conducting psychological neuropsychological evaluations for psychiatric outpatients. These evaluations may be brief or extensive, depending on the referral question. Typical referrals include diagnostic, cognitive, and/or personality testing. (Required)
   C. Acute Psychiatric Inpatient Unit: The fellow is responsible for conducting psychological evaluations for psychiatric inpatients. These evaluations are typically brief in nature, as the average length of stay is 7 days on the psychiatric inpatient unit. Typical referrals include diagnostic, cognitive, and/or personality testing.

III. Psychotherapeutic Interventions

   A. Adolescents in Motion Program (AIM) The fellow serves as a primary clinician for the AIM, a program for patients with severe psychopathology/behavioral problems. As a primary clinician, the fellow provides individual psychotherapy and case management and serves on a multidisciplinary treatment team. See appendix IV. (Required)
   B. Outpatient Group Therapy: The fellow conducts a cognitive-behavioral group and/or interpersonal process group or a combination of several outpatient group therapy patients with severe psychopathology.
C. Adult outpatient psychotherapy: The fellow treats a small number of patients in longer-term individual psychotherapy. (Required)

D. Acute psychiatric inpatient individual psychotherapy: The fellow will provide evidenced-based, time-limited psychotherapy to patients who have been admitted to the psychiatric inpatient unit through the Ben Taub Emergency Center (BTEC). Due to the setting, therapy often involves crisis intervention/stabilization/management and motivational interviewing. Fellows will utilize different therapeutic approaches (e.g. CBT, DBT, insight-oriented, strength-based) depending on the patient’s psychiatric presentation. (Required)

E. Acute psychiatric inpatient group psychotherapy: The fellow will co-facilitate a daily coping skills group. Group topics include self-care, anger management, problem-solving, assertiveness, and distress tolerance. (Required)

F. Adolescents in Motion (AIM) Intensive Outpatient Program: The fellow serves a primary clinician for AIM, a program for adolescents and their parents. As a primary clinician, the fellow provides individual and family therapy weekly, leads the skills group, provides case management, and works on a multidisciplinary team. (Required)

E. Child and family psychotherapy: The fellow treats a small number of patients in longer-term individual and family psychotherapy in our child psychiatry clinic. (Required)

F. Elective Rotation: The fellow will have the opportunity to spend a designated period of their time engaging on an Elective rotation. Fellows will be able to choose from one of the four elective options available listed below: (Required)

1. Geriatric Elective
2. Research Elective
3. Autism Elective
4. Specialized Outpatient Groups

IV. Clinical Supervision

The fellow receives specialized training in the supervision of clinical psychology graduate students, psychology trainees and/or psychiatry residents. The fellow supervises the treatment of one to two individual psychotherapy patients, under supervision of their primary clinical supervisor. In addition, the fellow may further contribute to the supervision and teaching of psychology and psychiatry trainees by demonstrating the use of assessment tools and participating in case consultation meetings. (Required)

V. Multi-disciplinary Consultation

A. As noted above, the fellow participates on several multi-disciplinary treatment teams, which may include IOP, AIM, the C&L service, and the Acute Psychiatric Inpatient Unit. In each setting, the fellow provides consultation to other treatment professionals, such as by attending treatment team meetings, providing oral
and written feedback to the team, and seeking out the services of other professionals when necessary (e.g., by making referrals to psychiatry, social work, occupational therapy, or substance abuse treatment). (Required)

B. The fellow also attends Grand Rounds in the Psychiatry Department, which is a multi-disciplinary forum for the latest research and practice updates. (Required)

VI. Evidence-Based Practice

The fellowship is evidence-based, insofar as an empirical stance towards assessment and treatment is endorsed and empirically-supported treatments are encouraged. In addition, the fellow is provided opportunities to pursue a research project during the fellowship year, and to produce a manuscript for presentation and/or publication. The fellow may elect to create a new research protocol or to develop a smaller research study within the context of an existing protocol. The vast majority of patients receiving assessment or psychotherapy services are enrolled in research studies as part of their treatment. The fellow may draw from this database for their research endeavors.

SUPERVISION AND DIDACTIC EXPERIENCES

I. Supervision

Fellowship training follows a developmental model of supervision, beginning with more supervision and oversight of the fellow’s activities and progressing to greater autonomy, with supervisors taking a more consultative stance. Furthermore, the training program is flexible and tailored to the fellow’s interests and needs. At the beginning of the academic year, the fellow meets with the Director of Training and Deputy Chief of Psychiatry to identify personal goals within the competence areas identified by the program. Specific activities are then selected to achieve these goals, which allows for a customized fellowship curriculum.

II. Grand Rounds

The fellow attends weekly Grand Rounds in the Menninger Department of Psychiatry and Behavioral Sciences. Grand Rounds include lectures, case reviews, and research presentations. Grand Rounds provides an opportunity to hear and meet nationally recognized experts in the fields of psychiatry and psychology, as they present the most up-to-date information on a variety of topics.

III. Baylor College of Medicine (BCM) Psychology Fellow Network

The BCM Psychology Fellow Network comprises postdoctoral fellows from various Houston-area fellowships. The Network meets quarterly to discuss professional issues and listen to presentations by guest speakers on topics such as licensure, supervision, and diversity. The Network also provides fellows with regular information on jobs and additional training opportunities.

TRAINING RESOURCES

I. Training staff
The fellow is supervised by a licensed clinical psychologist(s).

In addition, the fellow will receive training from licensed psychiatrists and other mental health professionals in the context of the multi-disciplinary team approach.

II. Training support

The fellow has access to all training activities available to trainees at the hospital, including workshops, seminars, and conferences. Although the fellow does not receive a specific training fund, status as a fellow often provides access to training activities and resources at a reduced rate. The Training Director monitors such opportunities, including research funding, and makes them known to the fellow.

III. Facility and resources

The Psychology Service of Ben Taub Hospital is located in the Psychiatry Outpatient Program Clinic. Although the fellow works throughout the hospital, the Outpatient Program Clinic is the fellow’s home base. In the Clinic, the fellow has an office with a personal computer, e-mail access, and standard office software (e.g., Microsoft Word, Excel, PowerPoint). The fellow has access to computerized scoring programs (e.g., PAI, WAIS-IV, etc.) as well as access to therapy rooms, a testing room, and group rooms within this facility. Office supplies, electronic equipment (e.g., copy and fax machines), and testing supplies are provided by the hospital for the fellow’s use.

The fellow may also obtain a free Texas Medical Center library card, which grants access to all libraries within the Medical Center.

EVALUATION AND DUE PROCESS PROCEDURES

The fellow receives a formal evaluation from supervisors twice a year (see Appendix I for evaluation form). The fellow will be evaluated in a variety of competency areas and will be given specific feedback on strengths and areas that need improvement. The fellow also provides supervisors with formal evaluation after each rotation. The fellow completes a written evaluation (Appendix II). The evaluation form is given to the fellowship director who will then give the faculty your evaluation once the fellowship year is complete. Supervisors will receive informal evaluation/feedback from fellows at the end of each rotation. Formal due process procedures (see Appendix III) are in place for both the fellow and the training program regarding problem situations.

LEAVE POLICY

1. Fellows should notify their primary supervisor(s) 4 weeks in advance of any leave. Dr. Banu and Dr. Shah should also be notified. Once supervisor(s) approve leave, please send the leave request form to Charissa Wiltz for approval by Dr. Banu. This form should also include the name of the clinician covering for you.
2. For a leave of less than 2 hours, notify also your primary supervisor first. Once supervisor(s) approve leave, please send the leave request form to Charissa Wiltz for approval by Dr. Banu. This form should also include the name of the clinician covering for you.

**If more than 2 hours is needed for appointment, then one has to take the day off.**

3. If supervisor not available, then please email Dr. Sophia Banu for approval

4. Exceptions are made if there are no patients scheduled and in emergency cases

5. Fellows have 15 vacation days and 12 sick days, 4 Floating time Holidays. Please make sure you are keeping track of these through BCM website.

APPLICATION REQUIREMENTS

Interested applicants should send a letter of interest, current curriculum vitae, and three letters of recommendation to Dr. Flores aracelif@bcm.edu beginning 10/1/2015. Applications will be accepted until position is filled. Applicants must come from an APA- or CPA-Accredited training program. Applicants must have completed all requirements for the Ph.D. by 8/1/2016, including dissertation and APA- or CPA-accredited fellowship. U.S. citizenship is not a requirement for the fellowship. The fellowship begins 8/1/2016 and ends 7/31/2017. The interviewing process will begin in 1/2/2016 and will continue until position is filled. In person interviews are preferred. If fellow is hired, please be available a month in advance before the start of your fellowship in order to allow for paperwork.

Application may be submitted online. But also please send application materials via Email to Dr. Flores at aracelif@bcm.edu

EVALUATION PERIOD SUPERVISED:  1  2  3  (please underline)

TRAINING ASSIGNMENT:

SUPERVISION REPORT BASED ON (please underline):

Direct observation, videotape, audiotape, case presentation, review or written work, review of raw test data, discussion of clinical interaction, comments from other staff

| RATING KEY |
| ALL RATINGS ARE BASED ON THE FOLLOWING SCALE: |

<table>
<thead>
<tr>
<th>Rating:</th>
<th><em>FAIL</em></th>
<th><em>CONDITIONAL</em></th>
<th><em>PASS</em></th>
<th><em>HIGH</em></th>
<th><em>HONORS</em></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
</tbody>
</table>

1 = Fail

2 = Conditional Pass (Specific Remediation REQUIRED; performance below level of training)

3 = Pass (Performance and Recommendations equal to Level of Training)

4 = High Pass (Performance greater than Level of Training)

5 = Honors (Exceptional Performance significantly above Level of Training)

PLEASE NOTE: To meet the requirements of the FELLOWship program, an FELLOW must have a *PASS* rating on ALL criteria, for ALL review periods.

If a *PASS* rating is not obtained during any review period, a remedial plan must be agreed on between FELLOW and supervisor. Space is provided at the end of this form to outline (1) the specific goals of such a remedial plan, and (2) measures to evaluate whether these goals are met, and (3) the time frame within which these goals are expected to be met.
A. PROFESSIONAL BEHAVIOR and ETHICS

1. Evaluate reliability in keeping appointment, preparing material for supervision, and completing all patient care tasks (e.g., phone calls, notes); initiative in seeking out meaningful work experiences; ability to carry out assignments; timeliness with which work demands are met; knowledge and use of ethical principles; coping strategies for managing personal and professional stressors.

Rating (1-5):

Comments:

B. INTERPERSONAL WORK RELATIONSHIPS

2. Ability to work cooperatively with peers and other treatment personnel. Take into consideration such factors as the ability to empathize with the viewpoints and feelings of others and the ability to manage or resolve interpersonal differences; rate openness to feedback or critique, willingness to be open and candid with the supervisor about problems with patients or staff.

Rating (1-5):

Comments:

C. ASSESSMENT SKILLS

3. Grasp of the assessment process. Take into consideration the fellow’s knowledge of differential diagnosis, interviewing skills, selection and administration of procedures/tests, ability to integrate test findings (if used) with clinical interviews and behavioral observations, and ability to organize and communicate findings in a written report. Consider also the fellow’s ability to integrate science and practice in the assessment process.

Rating (1-5):

Comments:

D. THERAPEUTIC RELATIONSHIP SKILLS

4. Ability to form a therapeutic alliance with patients. Take into consideration the fellow’s ability to respect the patient, empathize with the patient, and provide an atmosphere to facilitate change.

Rating (1-5):

Comments:
E. THERAPEUTIC PROCESS SKILLS

5. Ability to conceptualize patients’ problems and intervene appropriately. Take into consideration the fellow’s ability to utilize the empirical literature to formulate a case, set treatment goals, develop a treatment plan, intervene, and evaluate improvement of therapy patients. Also consider ability to manage crises and make appropriate short-term safety plans.

Rating (1-5):

Comments:

F. PROFESSIONAL ROLE AND CONSULTATION SKILLS

6. Assess the fellow’s understanding of the different roles played by a psychologist in a clinical setting and his/her ability to function as a consultant or teacher to others. Take into consideration the fellow’s ability to integrate theory, research, and practical knowledge in this task, and consider development of a professional identity.

Rating (1-5):

Comments:

G. RESEARCH SKILLS -- INTEGRATION OF SCIENCE and PRACTICE

7. Ability to engage in the scientific process of advancing knowledge in both clinical and research settings. Take into consideration the fellow’s ability to generate research ideas and questions, formulate experimental methods, analyze results, and draw appropriate conclusions. Also consider ability to apply empirical literature to clinical work in both assessment and therapy applications.

Rating (1-5):

Comments:

H. CULTURAL DIVERSITY and INDIVIDUAL DIFFERENCES

8. Assess the fellow’s ability to take into account cultural diversity and individual differences in clinical work, including assessment, consultation, and interventions. Consider also the fellow’s sensitivity to individual differences in the research context, as well as in the context of didactic and case presentations.

Rating (1-5):

Comments:

I. OVERALL RATING

9. Please provide a composite rating of the fellow’s overall effectiveness. Take into consideration the fellow’s work habits, relationships with peers, supervisors, and other professional personnel, and in
particular the fellow’s abilities in research comprehension and application, patient assessment, therapeutic relationship, and therapeutic skills.

Rating (1-5):

Comments: (Description of strengths and weaknesses. Please provide specific recommendations for remediation, future supervision, experiences, and guidance.)

C. SUPERVISORY RELATIONSHIP

1. Created environment offering freedom to make mistakes 1 2 3 4 5 N/A

2. Provided ongoing feedback 1 2 3 4 5 N/A

3. Provided easily acceptable feedback 1 2 3 4 5 N/A

4. Challenged fellow to expand clinical skills 1 2 3 4 5 N/A

5. Respected fellow as an emerging professional 1 2 3 4 5 N/A

6. Exhibited commitment to fellow’s training 1 2 3 4 5 N/A

7. Exhibited characteristics of an excellent role model 1 2 3 4 5 N/A

8. Accurately conceptualized fellow’s strengths and developmental needs as an emerging psychologist 1 2 3 4 5 N/A

9. Communicated evaluation of fellow’s skills in a direct manner 1 2 3 4 5 N/A

10. Facilitated appropriate level of independence 1 2 3 4 5 N/A

D. GENERAL COMMENTS

1. What did you most enjoy about the supervision you received?

2. What did you least enjoy about the supervision you received?

3. What suggestions do you have for improving supervision on this rotation?
APPENDIX III
Due Process Procedures Psychology Post-Doctoral Fellowship

Post-doctoral Psychology Fellow Evaluation

Evaluations for fellows are conducted on a quarterly basis by their respective supervisor to monitor the development and readiness of Fellows. In Supervision, Supervisors provide ongoing feedback on Fellows’ strengths and areas of growth. The ongoing evaluation process provides regular feedback and evaluation of goals set for the training year. Professional autonomy increases and Fellows complete the program with developed competencies to practice as professional psychologists.

Definition of Inadequate Performance

Inadequate performance is defined broadly as an interference in professional functioning which is reflected in one or more of the following ways:
1) an inability and/or unwillingness to acquire and integrate professional standards into one's repertoire of professional behavior;
2) an inability to acquire professional skills in order to reach an acceptable level of competency; and/or
3) an inability to control personal stress, strong emotional reactions, and/or psychological dysfunction which interfere with professional functioning.

It is a professional judgment as to when a Fellow's performance becomes inadequate rather than of concern. Trainees may exhibit behaviors, attitudes or characteristics which, while of concern and requiring remediation, are not unexpected or excessive for professionals in training. Problems typically become identified when they include one or more of the following characteristics:

1. The Fellow does not acknowledge, understand, or address the problem when it is identified;
2. The problem is not merely a reflection of a skill deficit that can be rectified by academic or didactic training;
3. The quality of services delivered by the Fellow is sufficiently negatively affected;
4. The problem is not restricted to one area of professional functioning;
5. A disproportionate amount of attention by training personnel is required; and/or
6. The trainee's behavior does not change as a function of feedback, remediation efforts, and/or time.

Procedures for Responding to Inadequate Performance by a Fellow

If a Fellow receives an "unacceptable rating" from any of their supervisors in any of the major categories of evaluation, or if a staff member has concerns about a Fellow's behavior (ethical or legal violations, professional incompetence) the following procedures will be initiated:

1. The staff member will consult with the Training Director to determine if there is reason to proceed and/or if the behavior in question is being rectified.
2. If the staff member who brings the concern to the Training Director is not the Fellow's primary supervisor, the Training Director and/or person with the concerns will discuss their concern with the Fellow's primary supervisor.
3. If the Training Director and the primary supervisor determine that the alleged complaint, if proven would constitute a serious violation, the Training Director will the staff member(s) who brought up the complaint initially.

4. The Training Director will convene an ad hoc Training Committee comprised of appropriate psychologists housed at the Ben Taub NPC/Department of Psychiatry to discuss the performance rating or the concern. The Associate Chief of Psychiatry and the Head of the Psychology division will be informed of the concern.

5. Whenever a decision has been made by the Training Director and other parties designated above about a Fellow's status, the Training Director will inform the Fellow in writing and will meet with the Fellow to review the decision. This meeting may include the Fellow's primary supervisor.

6. The Fellow may choose to accept the conditions or may choose to challenge the action (see Due Process Guidelines).

**Remediation process and sanction alternatives**

Once inadequate performance is identified, it is imperative to identify meaningful way to address it. In implementing remediation or sanction interventions, the training staff must be mindful and balance the needs of the Fellow, the patients involved, members of the training group, the training staff, and other agency personnel.

1. **Verbal warning** to the Fellow emphasizes the need to discontinue the inappropriate behavior under discussion. No record is kept of this action.

2. **Written acknowledgment** to the Fellow formally acknowledges:
   a) that the Training Director is aware of and concerned with the performance rating,
   b) that the concern has been brought to the attention of the Fellow,
   c) that the Training Director will work with the Fellow to rectify the problem or skill deficits, and
   d) that the behaviors associated with the rating are not significant enough to warrant more serious action at that time.

   The written acknowledgment will be removed from the Fellow's file when the Fellow appropriately responds to the concerns and successfully completes the Fellowship.

3. **Written warning** to the Fellow indicates the need to discontinue an inappropriate action or behavior. This letter will contain:
   a) a description of the Fellow's unsatisfactory performance;
   b) actions needed by the Fellow to correct the unsatisfactory behavior;
   c) the time line for correcting the problem;
   d) what action will be taken if the problem is not corrected; and
   e) notification that the Fellow has the right to request a review of this action.
A copy of this letter will be kept in the Fellow's file. Consideration may be given to removing this letter at the end of the Fellowship by the Training Director in consultation with the Fellow's supervisor and training committee/Associate chief of psychiatry/Head of Psychology Division. If the letter is to remain in the file, documentation should contain the position statements of the parties involved in the dispute.

4. **Schedule modification** is a time-limited, remediation-oriented, closely supervised period of training designed to return the Fellow to a more fully functioning state. Modifying a Fellow's schedule is an accommodation made to assist the Fellow in responding to personal reactions to environmental stress, with the full expectation that the Fellow will complete the Fellowship. This period will include more closely scrutinized supervision conducted by the regular supervisor in consultation with the Training Director. Several possible and perhaps concurrent courses of action may be included in modifying a schedule. These include:

   a) increasing the amount of supervision, either with the same or other supervisors;
   b) change in the format, emphasis, and/or focus of supervision;
   c) recommending personal therapy;
   d) reducing the Fellow's clinical or other workload;
   e) requiring specific academic course work.

   The Director of Training, in consultation with the primary supervisor and the ad hoc training committee, will determine the length of a schedule modification period. The termination of the schedule modification period will be determined, after discussions with the Fellow, by the Training Director in consultation with the primary supervisor.

5. **Probation** is a time limited, remediation-oriented, more closely supervised training period. Its purpose is assessing the ability of the fellow to complete the fellowship and to return the fellow to a more fully functioning state. Probation defines a relationship and specific length of time that the Training Director systematically monitors the degree to which the fellow addresses changes and/or otherwise improves the behavior associated with the inadequate rating. The fellow is informed of the probation in a written statement, including:

   a) specific behaviors associated with the unacceptable rating,
   b) recommendations for rectifying the problem,
   c) time frame for the probation during which the problem is expected to be ameliorated and
   d) procedures to ascertain whether the problem has been appropriately rectified.

5. If the Training Director determines that there has not been sufficient improvement in the Fellow's behavior after the implementation of the above options, then the Training Director will discuss with the primary supervisor, the ad hoc training committee, Head of Psychology Division and the Associate Chief of Psychiatry the possible courses of action to be taken. The Training Director
will communicate in writing to the Fellow that the attempts to address the problematic behavior have not been successful, and the course of action that will be taken. If the Fellow's behavior does not change with these additional sanctions, the Fellow will not successfully complete the Fellowship. If these sanctions do result in successful change in the Fellow’s problematic behavior, then the Director of Training, the Fellow’s primary supervisor, Head of Psychology Division and the Associate Chief of Psychiatry will assess the Fellow's capacity for effective functioning and determine when direct service can be resumed. If the sanctions interfere with the successful completion of the training hours needed for completion of the Fellowship, this will be noted in the Fellow's file.

6. **Suspension** of direct service activities requires a determination that the welfare of the fellow's patient has been jeopardized. Therefore, direct service activities will be suspended for a specified period determined by the Training Director in consultation with the primary supervisor, Head of Psychology Division and the Associate Chief of Psychiatry. At the end of the suspension period, the fellow's supervisor in consultation with the Training Director will assess the fellow's capacity for effective functioning and determine when direct service can be resumed.

7. **Administrative leave** involves the temporary withdrawal of all responsibilities and privileges in the agency. If the probation period, suspension of direct service activities or administrative leave interferes with the successful completion of the training hours needed for completion of the fellowship, this will be noted in the fellow's file and the fellow's academic program will be informed. The Training Director will inform the fellow about the effects the administrative leave will have on the fellow's stipend and accrual of benefits.

8. **Dismissal** involves the permanent withdrawal of all agency responsibilities and privileges. When specific interventions do not, after a reasonable time period, rectify the problematic behavior or concerns and the trainee seems unable or unwilling to alter her/his behavior, the Training Director will discuss with the Associate Chief of Psychiatry and the Head of Psychology Division the possibility of termination from the training program. Either administrative leave or dismissal would be invoked and if such decision is reached the Training Director will notify the Fellow in writing.

**Due Process: General Guidelines**

Due process ensures that the training program's decisions about Fellows are neither arbitrary nor personally based. Specific evaluative procedures apply to all Fellows, and appeal procedures are available for Fellows who wish to challenge the program's actions. All steps need to be appropriately documented and implemented. General guidelines are as follows:

1. The training program's expectations related to professional functioning are presented to Fellows in writing and discussed both in group settings and with individual supervisors.

2. Formal evaluations occur with each supervisor at specified times.
3. Problematic behavior or concerns are clearly defined in writing and opportunities for discussion and clarification are provided if necessary.

4. Fellows are informed of due process procedures and written policies for appealing actions of the program when warranted.

5. The training program will institute a remediation plan for identified inadequacies, including a time frame for expected remediation. Consequences of not rectifying the inadequacies are clearly stated in writing.

6. The training program ensures that Fellows have sufficient time to respond to any action taken by the program.

7. The training program considers multiple professional sources when making decisions or recommendations regarding a Fellow's inadequate performance.

8. The training program documents the action taken by the program and its rationale, and provides this documentation to all relevant parties.

**Grievance Procedures**

The intent of due process is to inform and to provide a framework to respond, act or dispute. When a matter cannot be resolved between the Training Director and Fellow, the steps to be taken are listed in the BCM Policies and Procedures.
(a) Supervisor - The employee shall submit his/her complaint verbally to the employee's immediate supervisor as soon as possible, but not later than fifteen (15) working days, after the problem arises. The supervisor should orally answer the employee within five (5) working days after receipt of the complaint.

(b) Chairperson/Department Head - If the proposed resolution of the complaint by the supervisor is not to the employee's satisfaction, the employee may appeal the matter in writing to the chairperson/department head within five (5) working days of receipt of the supervisor's decision. The chairperson/department head will meet with the employee as soon as practicable and within five (5) working days of the meeting advise the employee in writing of his/her decision.

(c) Grievance Committee - If the employee is not satisfied with the proposed resolution of the matter by the chairperson/department head, he/she may, within five (5) working days of receipt of the decision by the chairperson/department head, submit a written appeal to the Vice President for Human Resources for transmittal to an ad hoc grievance committee which shall be appointed to review the matter. The written appeal shall be on forms which are available from Employee Relations. The chairperson/department head shall also be provided with the appropriate forms. The employee shall provide a complete statement of his/her complaint and attach any documents deemed relevant. The employee and the chairperson/department head shall receive a copy of the grievance forms completed by the other party. As soon as practicable, the committee will schedule a meeting at which both the employee and the chairperson/department head shall present their cases. Within ten (10) working days of the meeting, the committee will complete its review of the matter and advise both the employee and the chairperson/department head in writing of its recommendation.

(d) President - If the employee or the chairperson/department head disagrees with the recommendation of the committee, either party may, within five (5) working days of receipt of notification of the action of the committee, submit an appeal in writing to the President for a final determination. Such final appeal shall include copies of all submissions, determinations and correspondence related to the matter. Copies of the appeal shall also be sent to the other party and to Employee Relations. The President may seek input from both the employee and the department. The President's resolution to the complaint, which shall be the final decision on the matter, shall be given to the employee and the chairperson/department head in writing as soon as practicable after receipt of the appeal. The President may, in his sole discretion, delegate any responsibility hereunder to an individual or committee of his choosing.

(e) Employee Relations, will, at the request of the aggrieved employee, fully explain this procedure and assist him/her in completing the necessary forms and in preparing written submissions. Both the grievant and chairperson/division head will be provided a copy of the policy by Employee Relations.

(f) At any meeting at which the employee is present, he/she may be accompanied by another person, who shall serve as the grievant advisor, although this person may not otherwise participate in the proceedings.

(g) While the proceedings of the grievance committee shall be conducted in an orderly manner, the hearing will be of an informal nature and will not be governed by formal rules of evidence.

(h) This policy will be reviewed with supervisors annually.

Staff Grievance Committee
(1) If resolution cannot be reached at the department level, an ad hoc staff grievance committee shall be appointed by the Vice President for Human Resources to hear each grievance of a staff employee. The committee shall be composed of five (5) members selected from a list of faculty and staff members. The list shall include minorities and females, and it must be approved by the Academic Council of the College. Employee Relations shall serve as secretary and an ex-officio (non-voting) member of the committee.

(2) If an aggrieved employee feels that any proposed committee member may be predisposed to vote against him/her, the grievant shall object in writing to the Vice President for Human Resources to the inclusion of such person on the committee. Such writing shall set forth in detail the basis for the grievant's objection to the inclusion of such person on the committee. The Vice President for Human Resources shall, in his or her sole discretion, have the right to replace the proposed committee member with another person from the approved list.

Retaliation

It is a violation of Baylor policy for any person to retaliate against any employee for filing and pursuing a grievance under any College grievance policy. The grievance policy is available without regard to whether the aggrieved employee has filed any charge or complaint with any state or federal fair employment agency.
Inpatient Psychiatry Service: the PIU is a 20-bed, adult, co-ed inpatient psychiatric/medical unit. The PIU is the only psychiatric unit in the greater Houston-area capable of providing care for indigent patients needing psychiatric hospitalization, who also have medical conditions that frequently render them ineligible for services at other local psychiatric inpatient facilities. The unit is divided into two multidisciplinary treatment teams, each responsible for the care of 10 patients. Psychology fellows are expected to become active members of each treatment team which include an attending psychiatrist, psychiatry residents, medical students, occupational therapists, a social worker, a chaplain, a dietician, a substance abuse counselor, mental health workers, and nurses. With an average length of stay of eight days, the inpatient psychiatric service admits patients during acute disturbances or crises including mania, depression, psychoses, and characterological disturbances, as well as a variety of neurologic illnesses presenting with psychiatric symptoms.

During the inpatient rotation, the fellow will attend inpatient rounds four mornings per week. The function of these teaching rounds is to help formulate a diagnosis and treatment plan for each patient and to discuss each patient's treatment, progress and discharge plans. The fellow is encouraged to be an active participant by interviewing patients and providing feedback to the team regarding observations during intake interviews, interaction with patients on the unit, observations during group or individual therapy, and results of psychological testing. A primary goal for each fellow is to learn the team member role and consultation role of a psychologist in a hospital setting.

Adolescents in Motion (AIM) Intensive Outpatient Program
The Adolescents in Motion (AIM) program’s overreaching goal is to provide education and skills (interpersonal, coping, etc.) to adolescents and families that will improve the youth’s ability to function in all domains (home, school, community, etc.). AIM is designed for youth 13-17 years old who have emotional disorders such as depression, anxiety, and/or disruptive behavior disorders that interfere with their daily functioning. AIM is a 3-week-long intensive program for adolescents and their parents that is held on Tuesday and Thursday mornings. Psychology fellows, supervised by Dr. Leah Clionsky, will participate in the AIM program in the following ways: 1) Co-leading Dialectical Behavior Therapy Skills groups for adolescents with Psychiatry fellows twice per week; 2) Conducting individual therapy and family therapy for participants in the program; 3) Collaborating with a multidisciplinary team including psychiatry, social work, occupational therapy, and substance abuse specialists; 4) Attending supervision and staffing with the rest of the AIM treatment team; 5) Screening AIM referrals for interest and appropriate fit for the program.

Outpatient Child Therapy
Psychology fellows will be responsible for providing services for children aged 3-17 years old. Psychology fellows will provide child and family therapy to children referred from Ben Taub Psychiatry, the AIM program and the community under the supervision of Dr. Clionsky. Common referral reasons include disruptive behavior disorders, reactions to trauma, depression, anxiety, family conflict, and suicidality. Specific application of evidence-informed treatments, including elements of Parent-Child Interaction Therapy, Cognitive Behavioral Therapy, Trauma-Focused CBT, Dialectical Behavior Therapy, and other behavioral strategies, are encouraged.

Advanced Child Assessment
Psychology fellows will conduct weekly psychological assessments for children ages 6-17 years old for patients referred through the Harris Health System. Fellows will conduct clinical interviews, utilize evidence-based assessment measures, interpret data, write psychological reports, and provide feedback to
families to clarify the diagnostic picture. Common referral questions include assessment of ADHD, mood disorders, trauma reactions, somatic symptoms, psychosis, and intellectual/academic functioning. Emphasis will be placed on helping fellows to gain confidence in choosing appropriate assessment measures and ability to identify differential diagnoses for a very complex and challenging population.

**Consultation-Liaison Psychiatry Service:** Psychology is part of a multidisciplinary C & L Psychiatry Service providing consultations to patients throughout Ben Taub Hospital. During the Consultation & Liaison rotation, the fellow attends morning rounds. The fellow then works in conjunction with Dr. Flores, psychologist in the C & L service providing bedside psychotherapy, brief psychological assessments such as suicide, depression, anxiety and cognitive screeners. The fellow also provides brief psychological interventions at the bedside. Patients referred to C & L services are referred to psychological services by either the psychiatric team and/or by the medical teams. Such medical patients referred for psychological services present with primary or secondary psychiatric/psychological issues. The fellow provides consultation services to inform diagnoses, treatment decisions, and discharge planning as part of a multidisciplinary team by working in direct contact with a team of medical students, medical residents, social workers, spirituality as well as nursing staff. The psychology fellow serves as an independent consultant to services within the hospital.

**Psychiatry Outpatient Clinic:** During the outpatient rotation, the fellow provides psychological and cognitive assessment services to outpatients through the Psychiatry Outpatient Clinic to help with diagnostic clarification. Referrals primarily come from psychiatry and may include assessments for determination of ADHD, learning disability, intellectual and memory functioning, and dementia. The fellow may conduct between two to three outpatient assessments a month. The fellow will continue to gain experience expanding their knowledge using various assessment measures and with interpretation of results.

**Electives:**

1. **Geriatric Elective:** this will comprise a combination of consults, geriatric assessment, and/or therapy at Quentin Mease rehabilitation hospital.
2. **Research Elective:** this will allow the fellow with an opportunity to publish a paper with approved goals.
3. **Autism Elective:** this elective will be comprised of clinic and/or autism evaluations. There may be the possibility of Parent-child interaction therapy experience available.
4. **Specialized Outpatient Groups:** if fellow chooses to participate in this elective, the fellow will be able to lead Obsessive Compulsive Disorder group (OCD) and Trauma Focused CBT group and/or individual therapy of such patients.

**Note:** All ideas about the electives are open for discussion with fellowship director.
APPENDIX V
Psychology Faculty

**Leah Clionsky, Ph.D.** - Dr. Clionsky is the Program Director for Adolescents In Motion (AIM) Intensive Outpatient Program. She provides therapeutic and assessment services for children within the Harris Health System as well as consult and liaison services at Quentin Mease for geriatric patients. She supervises trainees in providing therapy and diagnostic assessment for children ages 6-17 years old. Specific clinical interests include evidence-based behavioral treatment for children and adolescents with severe disruptive behavior disorders and emotional dysregulation.

**Araceli Flores, Ph.D.** - Dr. Flores supervises the Consultation and Liaison Service activities, which include consultation, assessment, and brief therapy with medically-ill patients. She is also the Ben Taub Psychology Fellowship Training Director and serves an administrative role authorizing leave and addressing issues specific to the Ben Taub experience.

**Phuong T. Nguyen, Ph.D.** - Dr. Nguyen is the Internship Training Co-Site Director and the supervising psychologist for interns on the inpatient psychiatry rotation. He works primarily in the psychiatric inpatient service, teaching both a team member role and the consultation model. Dr. Nguyen also leads the Applied DBT Group, is the DBT Consultation Team Leader, and is the Program Director for the STAR Program.

**Jeannine Tamez, Ph.D.** - Dr. Tamez is the Program Director for IOP and Internship Training Co-Site Director. She supervises interns during their rotation for outpatient services. Her supervision style allows for more of a developmental model for supervision. Thus, she helps the fellow identify what stage of clinical development they are currently at and, with support and feedback, helps facilitate the fellow’s progression to the next stage in their clinical development.

**Nizete-Ly Valles, Ph.D.** – Dr. Valles is a psychologist who is currently in charge of the TF-CBT group and Autism Assessment. She works primarily with children providing clinical and psychological assessment.
