ZOLADEX
(GOSERLIN)

Zoladex reduces estrogen production by the ovaries in women. It is used for breast cancer. Zoladex is given by injection under the skin in the abdomen or thigh.

Possible Side Effects:

- Hot flashes and night sweats
- Decrease in libido (sexual desire)
- Vaginitis / vaginal dryness
- Loss of menstrual cycle
- Injection site reactions – redness and soreness
- Headaches

Rare Side Effects:

- Severe allergic reaction – itching, rash or difficulty breathing

These are the most common side effects for this medication. Talk to your healthcare provider if your symptoms become difficult to manage.

Notify your doctor’s office if you have any problems or questions with side effects. You may call 713-566-3552 (English) or 713-566-3551 (Spanish).
