

Advanced Technology/DLDCCC Mass Spectrometry Proteomics Core

Service Rates

The cost of each specific project is determined during initial consultations. Project design, and consequently various combinations of the unit charges (listed below) factor into the package service costs.

Service	BCM Rate	DLDCCC Rate
365 Profiling (per sample)	\$740	\$740
365 Profiling Analysis* (per project)	\$1600	\$1000
IP/MS (per sample)	\$800	\$800
IP/MS Analysis* (per project)	\$400	\$250
PTM Analysis (per protein)	\$90	\$60
Per-Band Sequencing	\$250	\$230

(*) At least one analysis charge is required per project. The analysis covers personnel efforts in technical and bioinformatics analysis of raw MS proteomics results. Since profiling and IP/MS analyses generally require a comparison of multiple samples, one analysis unit is charged per project that may contain up to 10 experiments.
