1. Introduction

Congratulations and welcome! The Postdoctoral Fellowship offered by the Division of Nephrology of the Department of Medicine at the Baylor College of Medicine (BCM) provides an opportunity to pursue advanced training in clinical nephrology and to undertake training in basic science research or clinical research. The program is designed for trainees who wish to receive outstanding educational training in order to pursue a career in academic medicine (basic science, clinical research, or clinical education) or private practice.

The mission of our Nephrology Fellowship program is to produce Nephrologists who are leaders in the field of Nephrology, whether in clinical or basic science endeavors. We also aim to produce physicians who possess habits of lifelong learning in order to build upon their knowledge, skills and professionalism.

The clinical Nephrology program at BCM involves **TWO** years of training at affiliated site hospitals in order to integrate the 6 core competencies (patient care, medical knowledge, practice based learning and improvement, interpersonal and communication skills, professionalism and systems based learning). The trainee will participate in clinical training, research and scholarly activities. The training experience includes inpatient consultation services, procedural experience, management of end stage renal disease, basic renal pathology, transplantation nephrology, and outpatient nephrology clinical activities. The clinical nephrology section at Baylor has an outpatient dialysis population of approximately 500 hemodialysis and peritoneal dialysis patients – including partnership with one of the largest peritoneal dialysis clinics in Houston. Our patients represent a wide mix of racial and socioeconomic groups.

The 24-month curriculum consists of 12-14 months of general inpatient consultation, 4-6 months of primarily transplant nephrology, 3-4 months of procedures, and 3-4 months of research. The fellows have 3 weeks of vacation per year plus a minimum of four days academic leave for specific conferences. During the procedural months, our fellows may receive additional training and experience in the areas of renal histopathology, plasmapheresis, radiology, and ultrasonography. The 14 months of general inpatient nephrology span four primary hospitals: Ben Taub General (County), Michael E. DeBakey Veteran’s Affairs (Government), Houston Methodist (Private), and CHI Baylor St. Luke’s (Private). Fellows at CHI St. Luke’s frequently will have patients at the Texas Children’s Womens’ Pavilion. Outpatient experiences include several transplant clinics, a glomerulonephritis clinic, outpatient dialysis, combined urology-nephrology kidney stone clinic, and pediatric nephrology clinic. This breadth of experience is the cornerstone of our nephrology program and what makes Baylor College of Medicine a fantastic place to complete your training.

Following two years of clinical training, the trainee will have confidence in evaluating and managing patients with a wide variety of kidney disorders (including transplantation), and have had in-depth training in acute and chronic hemodialysis, continuous renal replacement therapy (CVVHD), renal biopsy, dialysis catheter placement, ultrasound and renal biopsies. Each fellow performs approximately 30-40 renal biopsies during his/her training period.

The didactic sessions begin in July with orientation, introduction to nephrology lecture series, and KDIGO guideline review. Fellows have two hours dedicated time on Wednesday afternoon and one hour (noon) every Thursday for journal club. Starting in September, fellows’ attend a weekly city-wide conference, Renal Grand Rounds (RGR). The first week of each month is a dedicated renal biopsy conference, where our fellows often present and discuss cases. There is also a monthly pathology conference jointly with the UT-Nephrology fellows’.

The trainee will also have: 1) developed skills to be an effective physician, 2) an appreciation of hypothesis driven research.

**WE WISH YOU ALL THE BEST AND WILL SUPPORT YOU IN ANY WAY POSSIBLE!**
**CHARACTERISTICS OF THE SUCCESSFUL BAYLOR NEPHROLOGY FELLOW**

**SUPERVISION AND LINES OF COMMAND**

The program director (PD) oversees coordinates all aspects of the nephrology fellows’ education and training, including their supervision by faculty members. Fellows are provided with responsibilities consistent with their level of training. Every patient examined, and every procedure or test performed is either done under direct supervision of a faculty member or is reviewed with a faculty member. If there are any problems with faculty members, inpatient or outpatient rotations, or educational opportunities, the program director is the first contact. The PD will hold monthly confidential meetings with the fellows collectively. The associate program director (APD) assists the program director with the operational aspects of the training program.

The program coordinator is responsible for enforcing that fellows are in compliance with program requirements including duty hours, vacations, credentialing, as well as managing orientation / graduation / interviews. The coordinator also functions as liaison between fellows, departments, attending physicians, administration and affiliated training institutions.

The section chief is responsible for setting the vision of the Nephrology division including changes to sites of health care (new clinics, hospitals, etc.) as well as supervision of the individual faculty members.

The chief fellow is a 2nd or 3rd year fellow and this individual is selected annually by the faculty based on excellence. This individual is responsible for making the schedules and communicating pertinent issues to the internal medicine chief residents. There is a stipend for this position. Fellowship classes often select a ‘social chair’ to coordinate picnics, outings, dinners, and other events for the group.

**Clinical Training**: Fellows round and present cases in teaching rounds, continuity clinic, dialysis clinics, and receive one-on-one instruction and feedback in history taking, physical examination, and in-patient and outpatient management of nephrology patients. All such encounters are supervised by Nephrology faculty members or affiliated members. At times, dialysis treatments or fellow encounters are not directly supervised. However, in all such cases, the fellow will know the appropriate faculty to contact if and when necessary. Attending physicians must be able to come to the hospital or facility to supervise any encounter.

**Clinical Training**: Procedures such as renal biopsy, urinalysis, placement of temporary vascular access catheters and hemodialysis / peritoneal dialysis procedures are directly supervised by the attending physician. At any time during the two year training period, attending physicians must be able to come to the hospital or facility to supervise any encounter.

**Research Training**: Throughout the course of any project, fellows meet regularly with their faculty mentor to report their progress and discuss the design and content of their projects.
Commonly Asked Questions

What is my exposure to dialysis?

The BT-2 (ESRD) rotation is designed to maximize your knowledge of hemodialysis. During this block, you will only be caring for patients with ESRD or newly starting dialysis. The curriculum includes didactics (infection guidelines, management of accesses), procedures (setting up the dialyzer, cannulating fistulas), and teamwork (communicating daily with nurses, dieticians, social workers). At CHI Baylor St. Luke’s Hospital, you care for inpatients admitted with complications related to peritoneal dialysis.

The 2nd year fellow will be assigned 5 hemodialysis patients at a Baylor College of Medicine affiliated clinic in close proximity to the medical center. This fellow will see the patients each month and discuss changes with the attending physician. The 2nd year fellow will also be assigned 3 outpatient months at a Baylor College of Medicine affiliated peritoneal dialysis clinic with one ½ day clinic per week.

What is my exposure to transplantation?

Our fellows see patients at three different venues that provide transplantation: Houston Methodist, CHI Baylor St. Luke’s, and the Veteran’s Hospital. Fellows on two services (Methodist and SL-Private) typically have over 50% of their service as transplant patients. You will see pre-transplant evaluations as well as manage patients with existing or new transplants.

There are three dedicated transplant clinics. The primary transplant clinic at Houston Methodist has two 2nd year fellows for 6 months per year. The second transplant clinic is for the fellow on the SL-Private rotation and is at CHI Baylor St. Luke’s. The third transplant clinic is for the VA-2 fellow at the VA hospital. In addition to ½ day clinic per week, this fellow is responsible for presenting patients to the medical review board.

What is my exposure to research?

Our faculty includes some of the most respected basic science and clinical researchers in the field of Nephrology, and Baylor has other excellent research mentors in parallel fields.

Each fellow is required to submit one abstract to the American Society of Nephrology meeting prior to attending as a 2nd year fellow. The abstract can be research or patient care (case report). Each fellow will select a mentor within the first few months of training and work on his/her project throughout the two-year program. Each fellow presents at our city-wide renal grand rounds at least once. The VA-3 rotation is fully dedicated for research, with the exception of fellows’ outpatient clinic. Most fellows’ research projects are designed to answer a clinical question using existing databases, educational research, or quality improvement.
2. Your Week at a Glance

Monday

12:00pm: Kidney Biopsy Conference at Methodist (10th Floor Outpatient Center)
   MUST be attended by TMH fellow. Transplant biopsy cases discussed
1:00pm: VA Clinic for fellows assigned (1st Floor, near blue elevators, specialty clinic)
1:00pm: Baylor College of Medicine Urology-Nephrology Combined Stone Clinic for 2nd year fellow assigned
   (McNair Campus, Urology Clinic 10th floor, take shuttle)
1:00pm: Baylor College of Medicine Pediatric-Nephrology Clinic for 2nd year fellow assigned (Texas Children’s Hospital, Feigen Center)

Afternoon (optional): 2nd year fellows to complete hemodialysis rounds on assigned patients (one visit / month)

Tuesday

12:15pm: Third Tuesday: Confidential meeting with program director. BCM 7th floor conference room.
1:00pm: Methodist Transplant clinic (10th Floor Outpatient Tower) for 2nd year fellows assigned
1:00pm: St. Luke’s Transplant Clinic (Baylor Clinic 14th Floor) for the SL-Private fellow. Fellow on this service must attend at least weekly (Tuesday or Thursday)

Wednesday

12:15pm to 1:15pm Second Wednesday each month: Combined kidney biopsy conference with Dr. Glass and the UT-Nephrology fellows’ at UT-Houston
1:30 – 2:30pm: EVERY Wednesday September to June, Renal Grand Rounds, attended by ALL fellows
   LOCATION: Methodist Hospital, Bluebird Auditorium (part of Jones Building)
2:30 – 4:00pm: Fellows’ didactic lectures / educational time immediately following grand rounds.
4:00pm (optional): Texas Children’s Pediatric Nephrology Biopsy Conference at basement St. Luke’s

Thursday

12:15pm: Baylor College of Medicine Internal Medicine Grand Rounds (Medical School, M112)
12:15 – 1:00pm: Journal Club. BCM Research Building, 7th floor conference room.
1:30pm: Smith Glomerulonephritis clinic for BT-3 fellow. 2525-A Holly Hall Street (Smith Clinic)
1:30pm: VA Transplant Medical Review Board Meeting – attended by VA-2 fellow if there is a patient to present.
1:30pm: St. Luke’s Transplant Clinic (Baylor Clinic 14th Floor) for the SLEH-Private fellow
   The fellow on this service should attend this clinic once a week (Tuesday or Thursday)
1:30pm: Peritoneal Dialysis Clinic for 2nd year fellow assigned (7505 Main St)

Friday

1:00pm: Ben Taub General Nephrology Clinic at Smith Clinic for fellows assigned and BT-3 fellow
Afternoon (optional): 2nd year fellows to complete hemodialysis rounds on assigned patients (one visit / month)
Individual Rotations (by template)*

Rotations listed below as months assigned during 24 month clinical curriculum. **Afternoon:** All fellows will have ½ day per week for outpatient clinical responsibilities (see previous page for details / assignments).

*For each hospital rotation, one fellow should plan to be available (if possible) on Monday, Tuesday or Friday to see consults. St. Luke’s and Methodist fellows’ cross-cover if necessary. If this is not feasible due to clinic and other educational activities, please make the attending aware or that a resident is available to cover urgent consults.

**Procedures include non-cuffed dialysis catheter placements, cuffed catheter removals, kidney ultrasounds, observing plasmapheresis with clinical pathology, and kidney biopsies. If there are no procedures scheduled for that morning, the fellow should use free time for reading. There is a curriculum folder + ultrasonography textbook + online tutorials in the Ben Taub Fellows rooms. Fellows are encouraged to spend at least ½ morning each week with a private interventional nephrologist (details with the program director). Each fellow must complete a checklist of procedures each month.
VACATION POLICY

**Time:** Fellows have 3 weeks of vacation each year plus a minimum of 4 days academic leave (for conferences).

**Detail:**

1. Vacation can be taken anytime, but fellows’ should not take more than one week of vacation during a specific rotation without special permission from the program director.

2. No more than two fellows are allowed to take vacation at any given time. Priority is given by the order that the request is received.

3. Fellows will not be responsible for finding coverage for clinics, provided request is submitted >60 days in advance and provided that no other fellow has submitted a request for the particular clinic. Fellows are required to email the program director, chief fellow, and respective clinic chief for mandatory clinics (Smith GN, Transplant Clinic, VA CKD, or BT CKD). This will allow the clinic chief to adjust patient census for that date or bring additional physicians to help.

   In the instance that two fellows submit and receive vacation for the same week, and both fellows require the same clinic to be adjusted in census, the fellow who submitted vacation second will need to find cross-coverage. This is in order to minimize the wait time and overbooking for the clinic and avoid overloading the panel for that day.

4. If there is a research fellow in his/her 2nd year, he/she will be able to cross-cover during vacation for 4-6 weeks per year.

5. Fellows should not request off more than 2 clinic day per 5 days vacation, this rule is to prevent fellows’ from repeatedly requesting off Friday or Monday, which are typical days for our clinics.

Conferences – Fellows have $1200 stipend per year to use for conferences

Our 2nd year fellows typically attend American Society of Nephrology Annual Meeting in November. The 1st year fellows usually attend the National Kidney Foundation Annual meeting in April. We require that 2nd year fellows submit one abstract to ASN in order to receive the stipend to attend. All fellows’ clinics are blocked during these two conferences to facilitate attendance and cross-coverage of inpatient service.

If a fellow chooses to attend another conference, instead of ASN or NKF, he/she may elect to do so and utilize the stipend towards this conference.

Priority for ASN is given to 2nd year fellows’ and then to 1st year fellows that have an accepted abstract.

Fellows may also attend other conferences and use ‘vacation’ time and his/her own finances to attend.

Fellows have 4 additional days for academic leave each year. 2nd year fellows utilize these days for the Home Dialysis University conference. This conference is sponsored by Baxter and open to graduating fellows, registration and lodging are nearly 100% covered by the sponsor. If these days are used for another conference or meeting, the program director will need to verify that it is truly ‘educational.’
3. OUTPATIENT CLINIC OVERVIEW

Continuity and Mandatory Clinics.

Each fellow will spend a 6 month block at 1) VA, 2) BTGH, 3) Transplant, 4) Miscellaneous Clinics
The Miscellaneous block includes: Peritoneal, Stone, Pediatrics, and Private Nephrology weekly clinics

Ben Taub CKD (Smith Clinic) (2525-A Holly Hall St, Houston, TX 77054) – FRIDAY AFTERNOON
  - 1st year fellows only will be assigned in 6-month blocks
  - BT-3 (procedure) fellow is also assigned each week
  - General CKD patients, typically 4-8 patients per fellow

VA CKD Clinic – MONDAY AFTERNOON
  - 1st year fellows will be assigned in 6-month blocks
  - VA-2 fellow ONLY if < 3 fellows in clinic that week

Methodist Transplant clinic – TUESDAY AFTERNOON
  - 2nd year fellows will be assigned in 6-month blocks Each fellow will have at least 6 months of transplant clinic

Baylor College of Medicine Scott St Hemodialysis Clinic
  - 6120 Scott St Suite F, 713-741-7059
  - MWF 3rd shift– each 2nd year fellow must see their patients at least once month and discuss plan with attending

Peritoneal Dialysis Clinic – THURSDAY AFTERNOON
  - 7505 Main St, Houston, TX 77030     713-799-9344
  - Prosperity Bank Building. Park in the parking garage. Parking is validated.
  - 2nd year fellows will do a 3-month block

Baylor Kidney Stone Clinic (Mc Nair Campus 10th floor, Urology, take shuttle) – Monday afternoon
  - Staffed by urology attending, dietician, attending nephrologist, and both urology + nephrology fellows
  - Excellent learning opportunity
  - 2nd year fellows spend 1 months

FGP (Faculty Group Practice) Baylor Clinic (6620 Main St, Suite 1375) – Tuesday or Thursday afternoon
  - Staffed by Baylor nephrology attending. ‘private practice feel’ with a nurse and assistant to room patients, and help with follow-up
  - 2nd year fellows spend 1 month per year

Pediatric Nephrology Clinic (Texas Children’s Hospital) – Monday afternoon
  - 2nd year fellows spend 1 month per year
Additional “Non-continuity” Clinics (only during specific rotations)

St. Luke’s Private Transplant Clinic (SL – Private)
- Begins at 1:30pm Thursday and 1pm on Tuesday.
- Fellow on SL-Private rotation will be assigned
- Check out the one of the private group renal attending

Smith Glomerulonephritis Clinic (BT-3 – Procedure)
- 2525-A Holly Hall St, Houston, TX 77054
- Begins at 1:30pm Thursday.

Faculty Clinics (only during specific rotations)

Baylor Clinic (6620 Main St, Suite 1375)
- Most of our clinical faculty have general nephrology clinic here, typically ½ day per week in the afternoon
- Baylor Nephrology section wins the Press-Ganey Award for Outstanding Service nearly every year!
- This is where hospital patients will follow-up after discharge (713-798-8350; Nila or Rebecca)

Medical Directorship CQI (Quality Improvement) Meetings at Houston Dialysis Clinics
- Our clinical faculty hold medical directorships at 8 dialysis facilities Houston
- You will be assigned to Quality Assessment Process Improvement Meetings (QAPI) – 4-5 per year
4. Overnight and Weekend Call

Weekdays (Monday – Friday) are ALL HOSPITAL (4 hospital) HOME CALL

Weekends (Saturday – Sunday) are YOUR HOSPITAL ONLY CALL
  o Each weekend will be split between 3 fellows, 1st years generally doing 2 weekends, and 2nd years doing 1 weekend a month (on average)
  o Sign-outs are mandatory. Please call attending or fellow from that week if there are any questions about patient care. Remember, we do not want patients’ to feel as though you are just covering.

“...From the physician’s perspective, weekends in the hospital are all about coverage. I remember, during residency, feeling that the attendings brought in doughnuts for weekend rounds because the world owed us something for being there, holding the fort. I came to take it for granted that hospital life slows on the weekend. And I remember a moment in my early years of doing primary care when it suddenly seemed vital to get an MRI and a neurology consult and a psych evaluation for a child as the clock ticked down to Memorial Day weekend. I called in favors, begged and borrowed, boasted about having managed it, as if I had personally evaluated, treated, and cured the problem, against impossible odds. I guess I assumed that patients and families must understand the hurdles: weekends are harder and slower, things don't necessarily get done.

But when you’re sick and scared, or when your parent or child is sick and scared, it can be shocking to hear, over and over, about the ways that weekends are slower and things don’t get done. The sick person’s calendar is marked out in difficult days and sleepless nights, or in agonizing hours, but it takes no notice of days of the week, makes no distinction between time and overtime. Yet you find yourself being told, as a matter of course, that there's no physical therapy on weekends because there's no one here to do it or, on a Friday, that the psychiatry service — or the pain service, or the surgical subspecialty attending — will be in on Monday.

...My mother was just as sick on Saturday as on Thursday; physical therapy or wound care or pain management was not some frivolous extra. Why should we have to hear over and over again that it was the weekend, that there was only one person here to do whatever for the whole hospital or that someone was just cross-covering, didn't want to make any changes to the plan, the attending would be in next week? It seemed callous on the hospital’s part — expecting very sick patients and very worried family members to understand that the doctors' convenience had to come first. They need the weekend off, so you'll have to wait till Monday. Even in good hospitals, weekends had a decidedly makeshift feel, with a constant refrain of “I'm just cross-covering, we're short-staffed, the person you need will be here Monday.”

Well, it doesn't feel that way from the patient's side. From over there, it feels like every time the weekend comes around, you relearn that the hospital is not actually about patients. It's about doctors and nurses, physical therapists and nutritionists — people who are busily living their normal lives, when from the patient’s side, nothing is normal.”
5. Educational Enrichment

Reading / Textbooks
- Journal club articles and faculty presentation slidesets will be placed on a shared one-drive for everyone

Formal Didactics - Required
- Foundations of Clinical Investigation (FCI): One month course in August with evening lectures at 5:30pm
  https://www.bcm.edu/education/programs/clinical-scientist-training/courses/fundamentals-of-clinical-investigation
- Journal Club: Thursdays at 12:15pm at ABBR 7th Floor
- Renal Grand Rounds (RGR): Wednesdays at 1:30pm at Methodist Bluebird
- Biopsy Conferences: 1st Wednesday of RGR AND 2nd Wednesday at 12:15pm at UT-Houston Medical School
- Ultrasound Workshop: Annual workshop given by ultrasound technicians and Baylor Faculty
- Communications Workshop: Annual 1-day workshop by distinguished and invited faculty
- CRRT Workshop: Annual workshop given by Baylor Faculty and Critical Care Faculty
- Fellow didactic lectures: Wednesdays at 2:30pm. Organized into blocks over a 1-year period. Key ‘landmark’ lectures are given annually (e.g., Principles of Transplantation or Introduction to Glomerular Disease) during orientation (July-August). Topics during the miscellaneous months include Pregnancy, Billing / Finances, Kidney Stones, Cardiovascular Disease, etc. March is dedicated for board review.

Other Didactic Opportunities – Not Required
- Educational development courses offered by Department of Faculty Education (free). Many are open to residents / fellows. Topics include: Incorporating technology to education, Improve your power point skills
- Clinical Scientist Training Program (CSTP). 1- or 2-year course geared towards fellows and junior faculty interested in an academic career. Includes coursework at the graduate schools (such as biostatistics)

Formal Teaching Opportunities
- Physician Assistant (PA) Renal Pathophysiology Course. Each fellow is assigned one lecture per year
- Each fellow gives one renal grand rounds (June) prior to graduation as well as presents at select didactic sessions including biopsy conference and all journal clubs (above)
- Active formal teaching of residents and students via noon-lectures or course participation is encouraged.
Additional Opportunities to Master Nephrology...

Thank you for registering for a renal elective. We want this to be a very educational month for all of you. For that reason, I encourage you to round with our faculty on any of the following activities – outside of the inpatient service.

You will be exposed to patients who are typically not hospitalized and learn what a Nephrologist really does!

- **Glomerulonephritis Clinic** at Smith Clinic. Thursday Afternoon 1:30 - 5pm.
  - Patients with active glomerular diseases (membranous, lupus, FSGS, etc.) are seen in a unique, small 12-patient clinic with plenty of teaching opportunities.
  - Contact: Drs. Raghavan (rajeevr@bcm.edu) or Perez (jp134089@bcm.edu)

- **Outpatient Hemodialysis (HD) Rounds** at US Renal Baylor (Scott St and OST). Variable, time: 1 hour
  - Ever wonder where your patients go after discharge? Spend 1 on 1 time with the attending and learn the nuances of outpatient hemodialysis
  - Contact: Drs. Saridey (saridey@bcm.edu), Mandayam (mandayam@bcm.edu), Raghavan (rajeevr@bcm.edu) or Perez (jp134089@bcm.edu)

- **Outpatient Peritoneal Dialysis (PD) Rounds** at Wellbound Clinic. Variable, time: 1 afternoon
  - A growing number of patients are choosing peritoneal dialysis. BCM has the largest PD clinic in Houston. Learn how patients are able to dialyze at home and the complications associated with PD.
  - Contact: Dr. Workeneh (bworkene@bcm.edu)

- **Kidney Transplant Clinic** at VAMC (Monday 1 pm to 4 pm) or Methodist Hospital (Tue 1 – 5 pm).
  - Learn how to manage immunosuppressive medications, screen for opportunistic infections
  - Contact: Drs. Ramanathan (ramanath@bcm.edu) or Mandayam (mandayam@bcm.edu)

- **Renal Grand Rounds**. Wednesday Afternoon. Methodist Bluebird Auditorium. 1:30 - 2:30pm
  - City-wide conference attended by Nephrologists. Interesting topics, invited speakers.

- **CKD Clinics**. Bread and butter outpatient nephrology in a variety of settings. Afternoons, 1 – 5pm
  - Smith Clinic (Friday – Dr. Hamad), VA Clinic (Monday – Dr. Ramanathan), Baylor Clinic (Monday – Drs. Saridey or Workeneh, Tuesday – Drs. Raghavan or Perez, Thursday – Dr. Mandayam, Friday – Dr. Mitch)
  - CKD 5 Clinic. Tuesday AM (VA, Dr. Dolson)

- **Kidney Stone Clinic**. Unique clinic run in tandem with Urology (Dr. Link). Alternate Friday Mornings, Baylor Clinic.
  - Contact: Dr. Mandayam (mandayam@bcm.edu)

- **Ultrasound Guided Kidney Biopsies**. Ben Taub. Variable time. Contact: Dr. Raghavan (rajeevr@bcm.edu)

- **Interested in Nephrology?** Meet with Program or Associate Program Director to discuss further opportunities for research or shadowing, as well as answer any questions. Contact: Venkat Ramanathan or Rajeev Raghavan
6. Evaluations and Awards

E-value (monthly)
Fellows and faculty will evaluate one another on e-value. The program coordinator will provide you with further instructions on how to do this on a monthly and timely manner. Please begin by selecting all faculty that you spent at least two weeks with from the drop down menu. The more evaluations you have, the more data we will have to advise you on your progress through the fellowship.

Semi-Annual Meeting with PD
Every 6 months, you will meet one-on-one with the section chief, program director, and program coordinator to discuss your evaluations, progress, research projects, and future plans.

Semi-Annual Evaluation of the Program + Faculty
Every 6 months, you will meet with your fellows and the program coordinator (no faculty) to anonymously evaluate the program and each individual faculty. This information will be provided to the section chief who will discuss the report with individual faculty. You will be asked to evaluate items like: relationship with trainees, teaching skills, expectations, enthusiasm, clinical judgment, collegial responsibility, and role modeling.

Milestones (ACGME)
A committee of faculty (excluding the program director) meets on a semi-annual basis to assess your progress in the following six domains: patient care, medical knowledge, problem based learning, Interpersonal skills, professionalism, and systems-based practice. The report will be transmitted to the ACGME and will ‘map’ to your progress over a two-year period. The evalue reports you receive each month are tailored to the milestones format.

In-Training Examination & Highest Score Award
Each fellow at our institution takes the in-training exam in April. This is a mock board examination administered to fellows’ nationally at the same time. Results are tallied such that our institution’s scores are compared to the nation. The highest scoring fellow each year receive an award

Outstanding Educator Award
Teaching is not easy; it is a skill we want you to develop during your fellowship. The fellows and faculty select one fellow annually for this award. This individual makes the extra effort to teach students / residents during clinics and inpatient rotations, gives high quality presentations at journal club or grand rounds, and stimulates peers to learn Nephrology.
