IXEMPRA
(IXABEPILONE)

Ixempra is given to patients with metastatic breast cancer. It is given if you are found to be drug resistant to other treatments.

Common Side Effects:

- Decrease in blood cell counts that could lead to infection, bleeding or anemia
- Numbness and tingling in hands and feet
- Fatigue
- Muscle / body aches
- Hair loss
- Nausea and vomiting
- Mouth sores
- Diarrhea

Less Common Side Effects:

- Infusion-related reactions – chills, fever, pain, shortness of breath, rash, decreased blood pressure

These are the most common side effects for this medication. Talk to your healthcare provider if your symptoms become difficult to manage.

If you experience a fever of 100.4 or more report to the emergency room and notify your doctor’s office: 713-566-3552 (English) or 713-566-3551 (Spanish).
