Possible Side Effects:

- Mild to moderate nausea and vomiting
- Loss of appetite
- Increased risk for infection, bleeding or anemia
- Hair loss
- Diarrhea
- Stomach upset
- Metallic taste
- Missed or irregular menstrual periods
- Darkening in color of skin and nail beds

Less Common Side Effects:

- Bladder frequency, pain or bleeding is usually not seen with doses with breast cancer treatment, however it should be reported immediately if it occurs. Drink plenty of fluids after treatment. Empty your bladder every few hours for the first 8 hours after treatment.

These are the most common side effects for this medication. Talk to your healthcare provider if your symptoms become difficult to manage. If you experience a fever of 100.4 or more report to the emergency room and notify your doctor’s office: 713-566-3552 (English) or 713-566-3551 (Spanish).
